**Only interior of liner is finished*

Designer Series Commercial Extruded Gutter System, Model 120: This commercial gutter system is based on a concealed gutter design with extruded fascia profiles. The gutter (liner) is manufactured pre-notched and punched to receive fasteners, heavy duty brackets and straps. The liner joint consist of a formed connector plate to be sealed and riveted. The decorative fascia sections are fastened onto the liner's support bracket and liner. The internal liner strap fastens to wood substrate securing the system. Designer Gutter Hardware Package Includes joint sealants, stainless screws, nuts and aluminum rivets (unpainted).

(Default Selection are **BOLD**)
